

Life Cycle of a Butterfly Directions

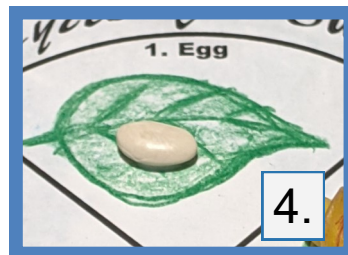

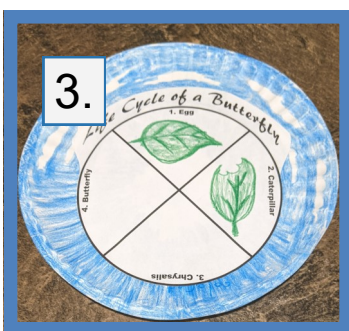

Materials: 6" paper plate, life cycle template, white bean, pasta noodles: bow-tie, rotini, shell; color pencils/markers, glue, scissors

Directions:

1. Color the paper plate.
Clouds are optional.

2. Cut out template and draw a leaf in egg and caterpillar sections.
The caterpillar stage should have a few bites taken out of leaf.

3. Glue the template to the colored plate.

4. Glue the white bean on top of leaf drawn in the Egg section.

5. Color the spiral-like noodle with colored pencil or marker and glue it on the leaf in Caterpillar section.

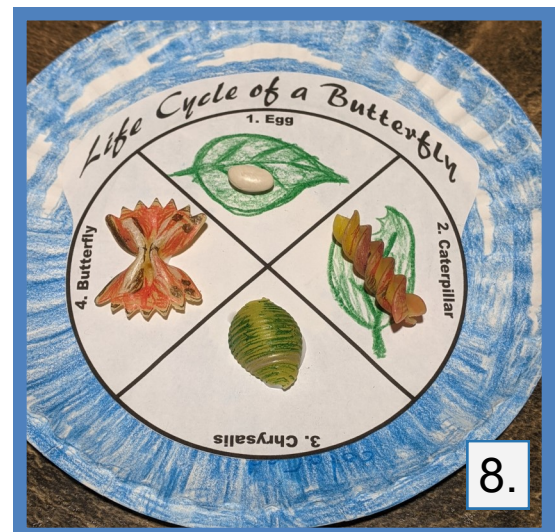

6. Color the shell pasta and glue it in the Chrysalis section.

7. Color the bowtie pasta and glue it in the Butterfly section.

8. Your pasta model of the butterfly life cycle is done!

When a caterpillar turns into a butterfly it goes through a process called metamorphosis.
