

Mexican Yarn Art Painting

Directions

Directions:

1. Place glue along where you want to lay your yarn.
2. Carefully lay your yarn along the glue. Use the outline as a guide.

*****Tip: It is best to start with any facial features, if your design has any, after you can start on the outside of your design and work your way in.**

3. As you place your yarn, you can change colors or stick with a solid color.

4. When you complete your design you can add some yarn for the background or leave it as is.
