

Make a Popsicle Stick Fish

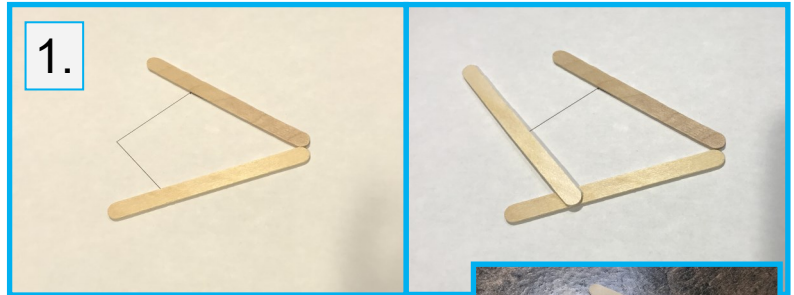

Popsicle Stick Fish Directions

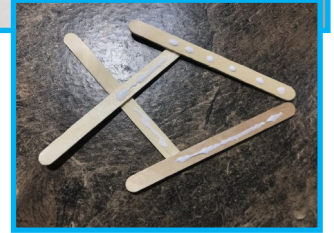

Materials: Paper circles, 4 popsicle sticks, construction paper, glue, & scissors

Directions:

1. Start by gluing the popsicle sticks together. Use the blue piece of paper as a template to get your shape. Do **NOT** glue the popsicle sticks to the paper. Set it aside to dry.

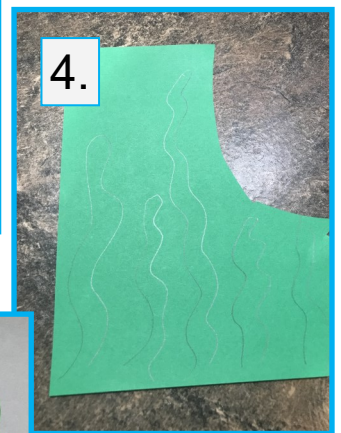

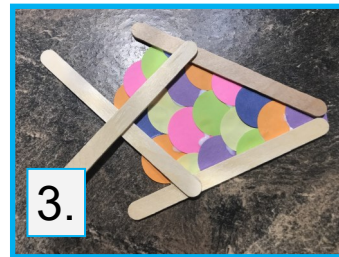

2. Glue the paper dots together, like scales. When doing this, keep in mind the diamond-ish shape of the fish's body.

3. Once the scales are together, glue them onto the popsicle sticks. Trim afterwards.

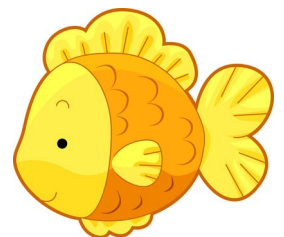

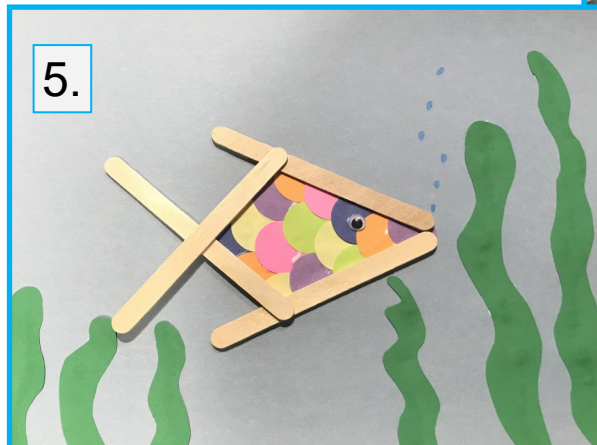

4. Set the fish aside and start working on the background. Cut seaweed or whatever ocean element you would like out of the green paper and glue it onto the blue. Glue your fish to the blue paper.

5. Glue an eye on.

6. All done!

PLEASE LEAVE DIRECTIONS ON TABLE ~ THANKS, WH NATURE CENTER
