

Make A TP Tube Platypus

TP Tube Platypus Directions

Materials: TP tube, brown paper, scissors, glue, stapler, googly eyes

Directions:

1. Start by folding your TP tube to create the head of the platypus. Use the pictures as a guide.

1.

1.

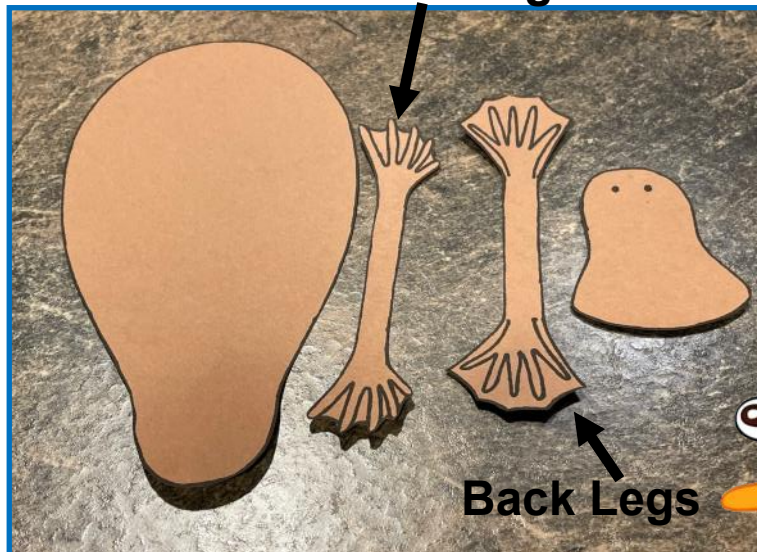

2.

2. Staple the TP tube to secure.

3. Cut out the legs, tail and bill of the platypus.

Front Legs

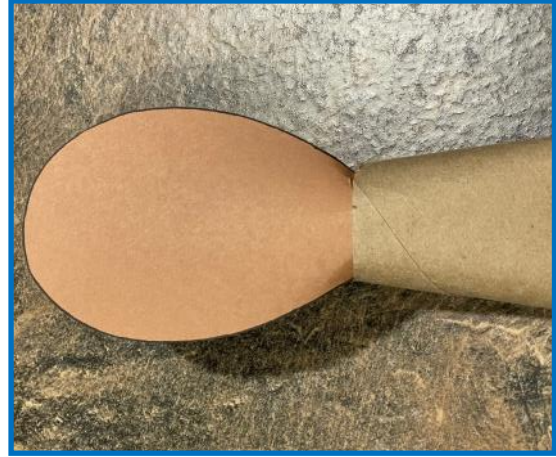

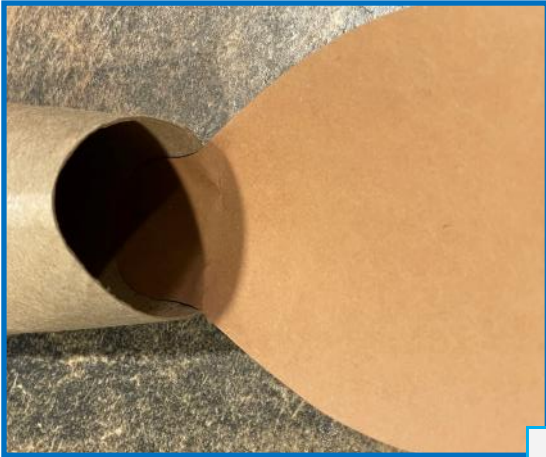

Back Legs

***Optional: If you do not want to cut the front legs as detailed, follow the picture "optional".

Optional

4. Glue the pieces of the body to the TP tube. Make sure you put the back legs and front legs in the right place.

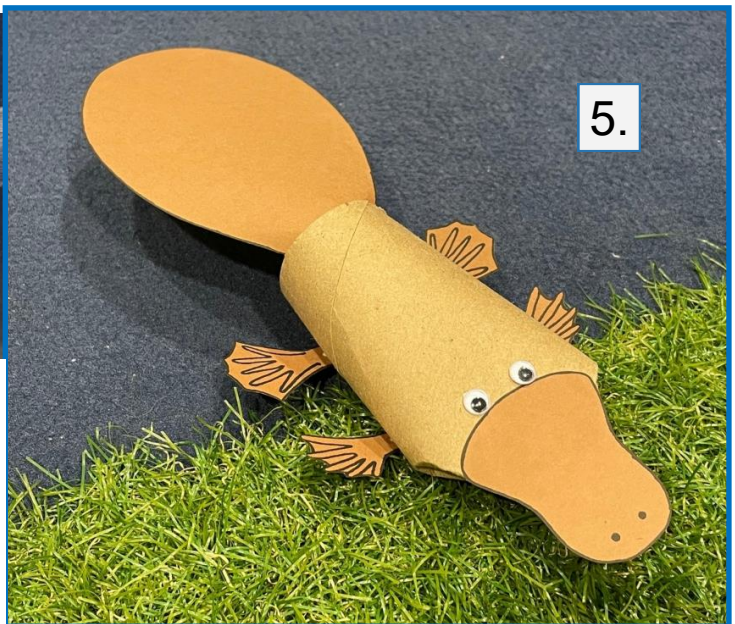

4.

5. Glue the eyes to the TP tube.

6. Give you new platypus friend a name!

5.
