

Make a TP Tube Goat

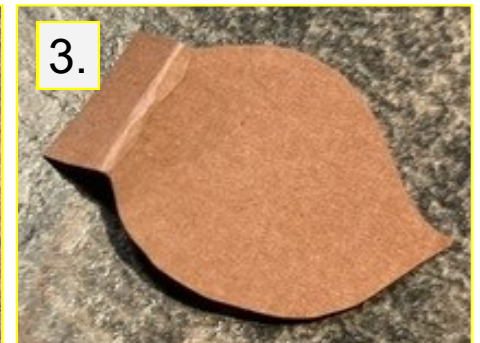

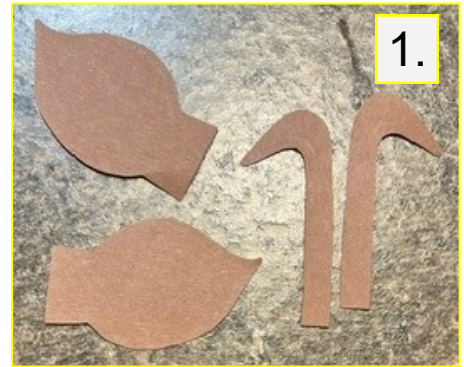

TP Tube Goat Directions

Materials: 1 TP tube, 2 cotton balls, 2 wiggle eyes, brown construction paper, black colored pencil, scissors, Elmers glue

Directions:

1. Begin by cutting the goat ears and horns from the template.
2. Glue the horns to the inside of the TP tube.
3. Fold a flap on the ear for easier gluing. Glue to either side of the tube.
4. Glue the wiggle eyes and draw a face.
5. Lastly, glue one cotton ball in between the ears and the other on the bottom of the TP tube. For the bottom cotton ball, pull the cotton down a bit after gluing to lengthen it.
6. You're all done!

PLEASE LEAVE DIRECTIONS ON TABLE ~ THANKS, WH NATURE CENTER
