

Make a Cupcake Liner Fish

Cupcake Liner Fish Directions

Materials: blue construction paper, tan construction paper, fin construction paper template, cupcake liner, 1 wiggle eye, colored pencils, scissors, stick glue

Directions:

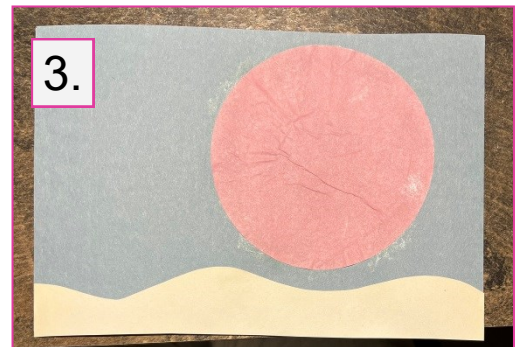

1. Cut waves into the tan strip of paper. This is the sand.

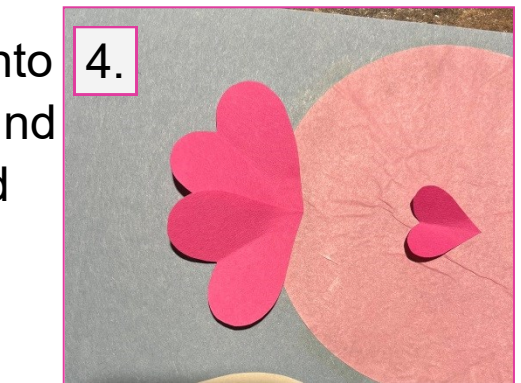

2. Glue tan strip of paper onto the bottom long edge of the blue half sheet of paper.

3. Flatten and glue your cupcake liner onto the paper. Glue it towards the right side of the paper to ensure you have enough room for the tail fin.

4. Cut the heart shapes out. Fold them in half to give them dimension. The two larger hearts make the tail fin. Glue them to the back (left side) of the cupcake liner. Glue the smaller heart onto the middle of the cupcake liner for a side fin.

5. Draw a mouth and glue the wiggle eye onto the cupcake liner. Decorate the background with seaweed and bubbles!

with seaweed and bubbles!

6. Hang your fishy up for all to see!
