

Make A Pretty Paper Peacock

Pretty Paper Peacock Directions

Materials: Construction paper (blue, green, yellow), wiggle eyes, black marker, colored pencils, glue, & scissors

Directions:

1. Start with tail: full light green sheet of paper. Fold in half on long side. Then accordion fold the short end of the paper, folding back and forth in about 1 inch segments; this makes the tail.
2. To decorate the tail, open the paper up and make sure that the ends of the paper (or at least one end) are bent and laying on the table like picture 2. Using black marker, draw raindrop shapes on each folded section. *****Notice on the image that the raindrop shape goes two different directions on either side of the paper lengthwise. This is to make raindrops go the same direction when folded up.**
3. Using colored pencils, color inside of raindrop shapes.
4. Refold accordion folds and staple in center of the fold.
5. Bring the ends together, and staple on the backside near the top. Now your tail is finished.

6. Cut out the blue body, yellow beaks and feet, and dark green wings.

7. Glue yellow beaks onto either side of blue beak.

8. On the dark green wings, draw feathers with marker, making sure that wings are facing opposite.

9. Glue wings onto body, only gluing on the larger end and slightly fold the other half of wing away from body. Repeat on other side.

10. Glue wiggle eyes to both sides of head.

11. On legs, fold at the top of foot and glue leg onto body behind the wing where its folded.

12. Attach the body to the tail. Place backside of body between the center fold of the tail and staple in place.

13. Show off your pretty peacock!
