

Make Pasta Bugs

Pasta Bugs Directions

Materials: Four types of pasta, markers, colored pencils, glue, piece of construction paper

Directions:

1. Color your pasta using markers. If using washable markers, allow the pasta to dry for a minute or so before glueing to avoid smearing ink.
2. BEFORE GLUING lay your pasta on the green piece of construction paper. Using a pencil, draw the additional parts of each bug. If you would rather do another bug than the four shown, check the other page for more ideas!
3. Go over the pencil lines with a marker. Line up and glue the pasta. You're all done!
