

Make a Popsicle Stick Baby Bird

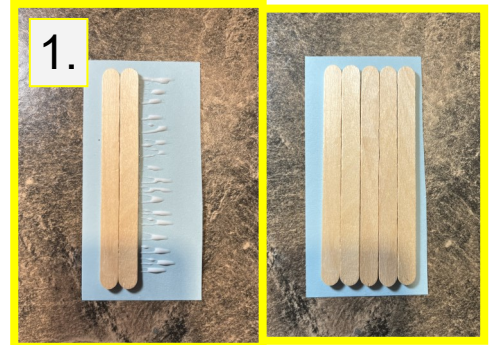

Popsicle Stick Baby Bird Directions

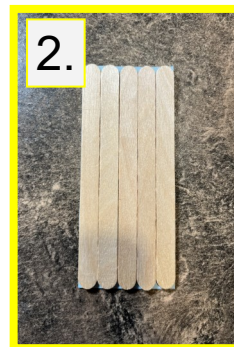

Materials: Popsicle sticks, orange construction paper, wiggle eyes, two feathers, heavy backing paper, crayons, glue, & scissors

Directions:

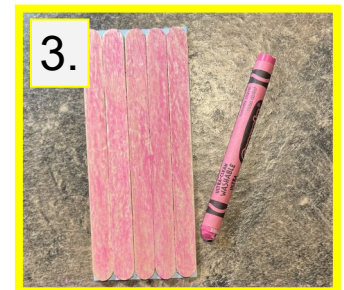

1. Start by gluing five popsicle sticks to the blue piece of paper. Once the sticks are glued on, give them a minute or so to dry.

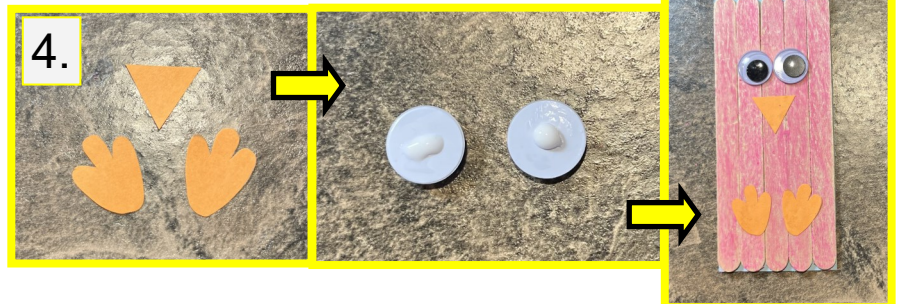

2. Now that the sticks are dry enough, cut the excess paper off the edges.

3. Choose a crayon to color your baby bird's body. Color all of the popsicle sticks.

4. Cut a beak and two feet out of orange construction paper. Add some life to your baby bird and glue these along with wiggle eyes to body.

5. Finally, flip your bird over and glue the feathers on either side. Only a small amount of glue is needed, as it will come right through the feather!

6. All done! Fly your popsicle stick baby bird around and show it off!

PLEASE LEAVE DIRECTIONS ON TABLE ~ THANKS, WH NATURE CENTER
