

# Make A Pop-up Groundhog

# Pop-up Groundhog Directions

**Materials:** Green construction paper, paper cup, groundhog template, popsicle stick, brown colored pencil, scissors, stick glue

## Directions:

1. Start by cutting the fan shaped piece of green paper.
2. Cover the outside of the paper cup with glue. Wrap the green paper around the paper cup, starting with the bottom curve of paper on the bottom edge of the cup. There should be excess paper on top of the cup.
3. Once your paper is secure, cut grass fringe along the top of the paper cup. The cut should start at the top of the paper and end just before the rim of the paper cup.
4. Cut out and color the groundhog.
5. Glue the groundhog to the top of the popsicle stick.
6. Feed the bottom of the popsicle stick through the slit in the bottom of the cup.
7. Move the popsicle stick up and down, you're done!
