

Make A Hopping Red-eyed Tree Frog

Red-eyed Tree Frog Directions

Materials: paper frog template, green leaf template, small piece of card stock, colored pencils, scissors, tacky glue

Directions:

1. Start by carefully pulling the paper pieces apart. You will have three items: the frog, leaf, and a rectangle piece of paper. →

2. Color your frog. After coloring, cut the frog out. If you prefer to not cut out the feet the whole way (see picture), color the extra parts between the toes.

3. Cut out the leaf. Now you have your frog and leaf.

4. Prepare the "spring". Take the rectangle paper and fold into thirds.

5. Glue one end of the "spring" onto the leaf. Then put glue on top of the spring and place the frog on top. Hold in place to set.

6. You're done! Let your frog dry before making it hop on the leaf!
