

Make A Sequin Fish

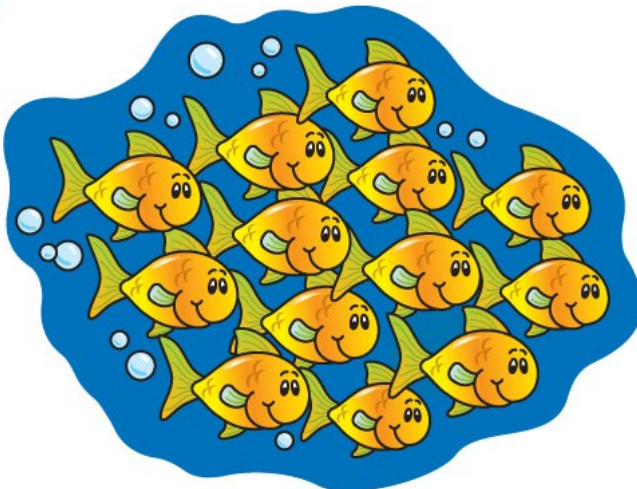

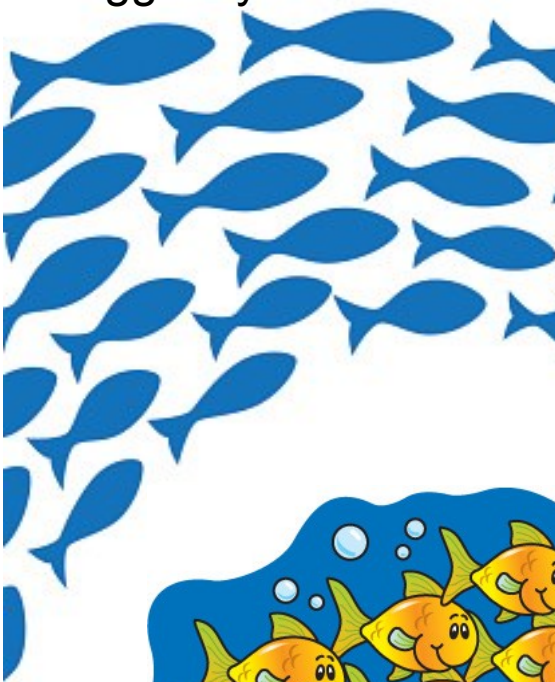

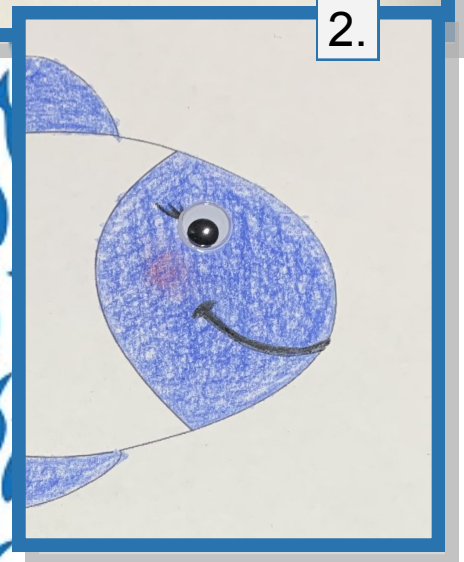

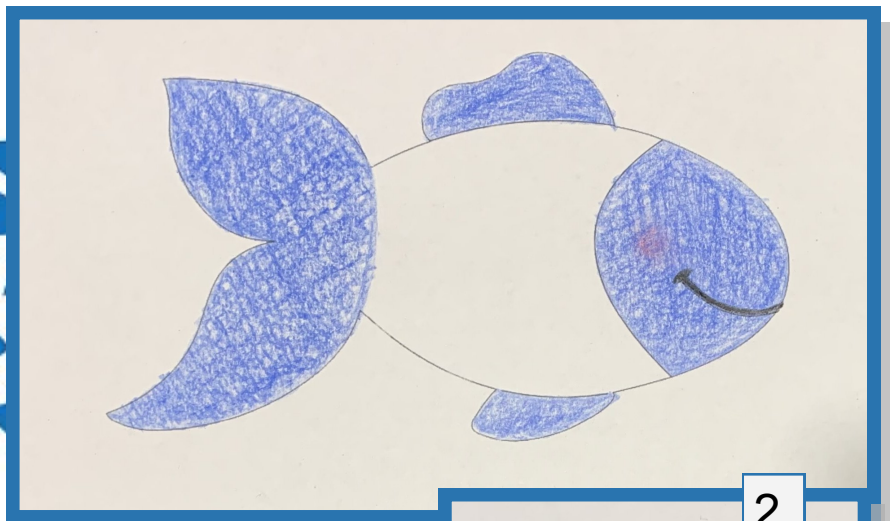

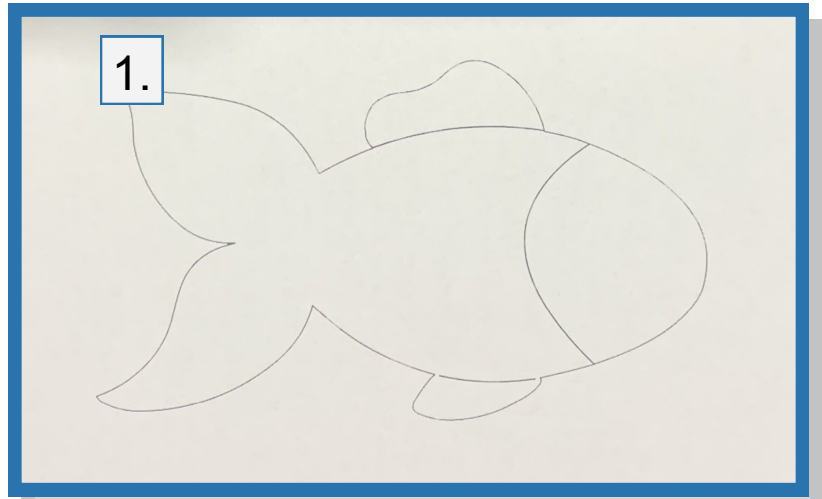

Sequin Fish Directions

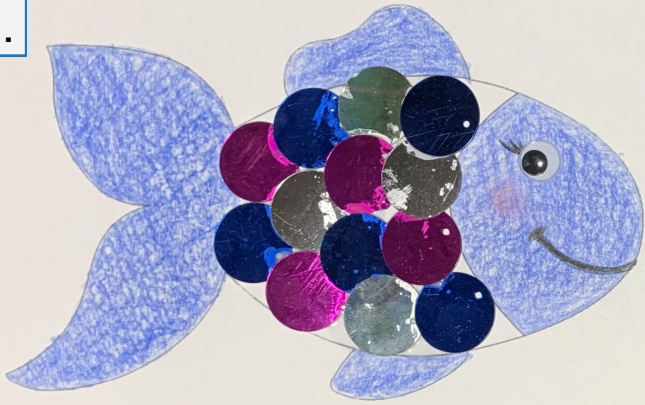

Materials: fish pattern, sequins, glue, crayon/colored pencils, wiggle eye, and imagination.

Directions:

1. Color your fish outline however you like. If you choose, you can leave the center alone since this is where the sequins will go.
2. Add a face to your fish. Then glue on the wiggle eye.

3.

3. Add the scales. Start by laying the sequins out on the fish to make the pattern you like. Then glue the sequins on starting from the tail area towards the head so the sequins overlap like actual fish scales. **For at home crafting: Use any size sequin if available, or try cutting circles out of various color paper. We used 20mm flat sequins.**

4. Next, color a fun background for your fish to swim in.
5. Hang up your fishy friend at home!

4.
