

# Make A Paper Plate Toucan

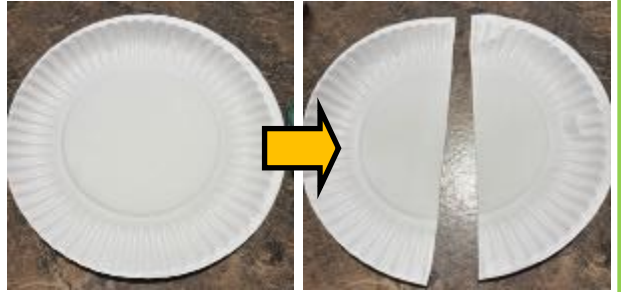

# Paper Plate Toucan Directions

**Materials:** paper plate, markers, scissors, glue

**Directions:**

1. Start by cutting your paper plate in half. (Folding in half helps to create a cut line.) One half will be the body and the other half the head with bill.

2. Glue the "head" onto the "body".

3. Draw an eye and pattern lines onto your bird using a black marker.

4. Color in your toucan using various colored markers. Then let your toucan dry a little.

(Please close the glue and markers so they don't dry out for the next person.)

5. You're done! Let your toucan fly around and back home! Learn more about the Keel-billed Toucan in this weeks Nature Journal page!
