

Make An Egg Carton Snake

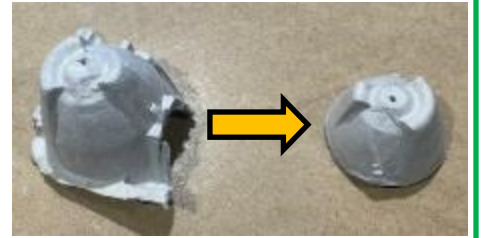

Egg Carton Snake Directions

Materials: 8-egg carton pieces, 8mm wiggle eyes, red pipe cleaner, crayons, scissors, tacky glue

Directions:

1. Start by trimming your egg carton pieces down, getting rid of excess.

2. Color egg carton pieces. Crayons work on Styrofoam but you may need to press harder.

We colored a pattern the same across all pieces. Next lay out to prep future step.

3. Pick one piece to be the head. Glue the wiggle eyes onto that piece, slightly apart.

4. String the carton pieces onto the pipe cleaner. Leave a piece sticking out of the head for a tongue. Turn the last piece around for the tail. Shape the tongue and fold up the tail piece of the pipe cleaner to keep it on.

5. You're done!
Help your snake slither home!
