Plastic Bottle Amazon Fish Directions

Materials: Plastic bottle, fin templates, scissors, Elmers glue, 20mm wiggle eyes, colored pencils, tissue paper

Directions:

1. Start by gluing the rectangle of tissue paper to your bottle. Align it to the bottom of the bottle. Be careful not to use too much glue.

2. Slowly add more glue to the bottle and carefully wrap the tissue paper. Continue wrapping until your bottle is covered.

3. Cut the strip of tissue paper into two shorter pieces. You can cut the strip into thinner pieces if you want.

4. Carefully glue and wrap the strips around the bottle. Set it aside to dry.

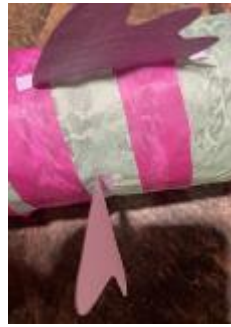

5. Color and cut your fin templates to allow your bottle some time to dry.

6. Fold the flap of the fin. Then glue it on the bottle.

7. Continue step 6 for all your fish fins. You may need to hold all the fins on for a few seconds to make sure they stay in place.

8. Glue the eyes on either side of your fish.

Your Plastic Bottle Amazon Fish is complete! Don't forget to give your new fish species its own unique name.
