

Make Wire Pumpkin Frame Décor

Wire Pumpkin Frame Décor Directions

Materials: Wire frame pumpkin, hot glue, scissors, wire cutters, may use: fabric, brown paper, fake flowers, twine

Directions - Option 1 Fabric Strips:

1. Cut your fabric into strips across the short edge. We suggest 3 inch wide strips minimum. (We started gluing from top to bottom.)

2. Carefully add a dab of hot glue to the wire at the side of the pumpkin. Then attach your fabric strip by folding the edge over the glue.

3. Weave your fabric strip under and over the wire. Fold the end of fabric over the wire and glue to secure in place.

4. Repeat steps 2-3 for all pieces of fabric. Add additional glue where necessary.

5. Trim the fabric in the back. Add additional glue if needed.

5. You can add flowers at the stem. Glue them together, then glue to stem of pumpkin.

PLEASE LEAVE DIRECTIONS ON TABLE ~ THANKS, WH NATURE CENTER

Directions - Option 2 Flowers:

1. Glue or use wire to attach your flowers to the pumpkin frame.

2. Wrap twine around the top of the stem if you'd like.

Directions - Option 3 Kraft Paper:

1. Cut or tear your paper into 3 inch wide strips.

2. Take each strip of paper and crumple/twist like a pretzel.

3. Use hot glue to carefully glue your paper strips to the vertical wire. You can twist the paper as you glue.

4. Frame out the pumpkin shape with paper twists.

5. Decorate the stem however you choose.
